

**Fourth Annual QUIKLOOK Users Group Meeting
August 18 & 19, 2010
Marion, Massachusetts**

AGENDA

Wednesday, August 18 (8:30 to 12:00)  **SOFTWARE** (Tabor Academy)

Registration / Continental Breakfast

Welcome & User Survey - Roger Masson

✓ **TTS: QUIKLOOK II MOV / AOV**

- **Upcoming revision**
 - **New features**
 - **Model change**
 - **Error notices**
- **Sensor Database**

✓ **User discussion, questions, requests and suggestions**

Wednesday, August 18 (12:00 to 1:00) - Lunch (Tabor Academy)

Wednesday, August 18 (1:00 to 2:30)  **SOFTWARE** (Tabor Academy)

✓ **TTS: Design / Test Data Software Update**

- **MIDAS / MIDATEST**
- **MIDAS Weak Link**
- **ACE / ACETEST**

✓ **User discussion, questions, requests and suggestions:**

- **Desired QUIKLOOK III features?**

QUIKLOOK

Wednesday, August 18 (5:00 to 9:00)

DINNER

Heritage Museum & Gardens, Sandwich Cape Cod, Massachusetts

- 5:00 pm – Tour the grounds of Heritage Museums & Gardens

Heritage Museums & Gardens consists of one hundred spectacular acres of labeled trees and shrubs, beautiful flowers and sweeping lawns. The gardens are a delight any time of year. Spring features showy Dexter Rhododendrons and flowering trees, while summer boasts brilliant annuals and dazzling daylilies. Autumn highlights blazing foliage and the fall-blooming Franklinia. Winter showcases beautiful heathers, bright berries and noble evergreens. On the energy front, the Old East Windmill at Heritage Museums & Gardens was built in 1800 in Orleans, Massachusetts. It served that community for 93 years grinding wheat, rye, barley and salt from the local salt works. During the Civil War the windmill also ground corn meal to be used as field rations for Union soldiers. In 1968, the windmill was sold to Heritage's founder, J.K. Lilly, III, and moved to its present location. In order to make the 32 mile trip, the windmill was disassembled into four pieces. The move took ten days as each power line had to be lifted to accommodate the height of the windmill. Once situated at the museum, the windmill was restored and fitted with an electric drive so it can run regardless of the presence of wind.

- 5:30 pm – View exhibits and short film
- 6:00 pm – Cocktail hour (J. K. Lilly, III Antique Automobile Museum)

Housed in a reproduction of a round stone Shaker barn on the Heritage grounds, the automobile museum features over thirty antique American automobiles. Trace automotive history from its beginnings through the mid-1900s or explore various types of automobiles including race cars and cars that ran on electric or steam power. Also featured in this building is a 1913 Ford Model T that visitors may sit in and imagine what life on the early roads was like.

Brief talk by:
Roger Masson, TTS

- 7:00 pm – Dinner (Heritage Reproduction Round Stone Shaker Barn)
(Details TBD)

QUIKLOOK

Thursday, August 19 (8:30 to 12:00)

SENSORS

(Tabor Academy)

- ✓ TTS: New / Updated Sensors
 - AOV Pressure Sensor Interface (PSI)
 - Rotor Contact Indicator (RCI)
 - Stem Position Indicator (SPI)
- ✓ Interpreting Anomalous MOV Test Traces
 - TTS to provide typical anomalous traces
 - Users to bring “mystery” traces
 - TTS & Users to interpret traces
- ✓ User discussion, questions, requests and suggestions

Thursday, August 19 (12:00 to 1:00) - Lunch

(Tabor Academy)

Thursday, August 19 (1:00 to 3:30)

SESSIONS

(TTS Training Room)

- ✓ TTS: Hands-on breakout sessions are planned for the following topics:
 - AOV Tests Using QUIKLOOK II
 - MOV Tests Using QUIKLOOK II
 - Spring Pack Calibration Using QUIKLOOK II and new Spring Pack Calibration Stand
 - MIDAS MOV Database Software
 - Thread Cuts
 - QSS Installation
- ✓ TTS will also provide facility tours during this period.
