

# Stem Position Indicator (SPI)

Teledyne Test Services' **Stem Position Indicator (SPI)** provides the valve tester with a convenient means to accurately measure valve stem position. This custom "string pot" has a magnetic base and a variable orientation to all the user to properly adapt to a variety of valve bodies and actuators including MSIV's, AOV's and MOV's. The SPI provides a calibrated signal for input to the QUIKLOOK II Acquisition Systems as well as the AOV Pressure Sensor Interface box.

## Features

- Ruggedized design
- Magnetic base for easy setup and attachment
- Adjustable orientation angle to allow proper alignment with stem travel
- 15 and 30-inch travel lengths standard, other sizes available upon request.

The **Stem Position Indicator** is available in several travel lengths and connects directly to the QUIKLOOK II, QL II+ and Pressure Sensor Interface Systems.
